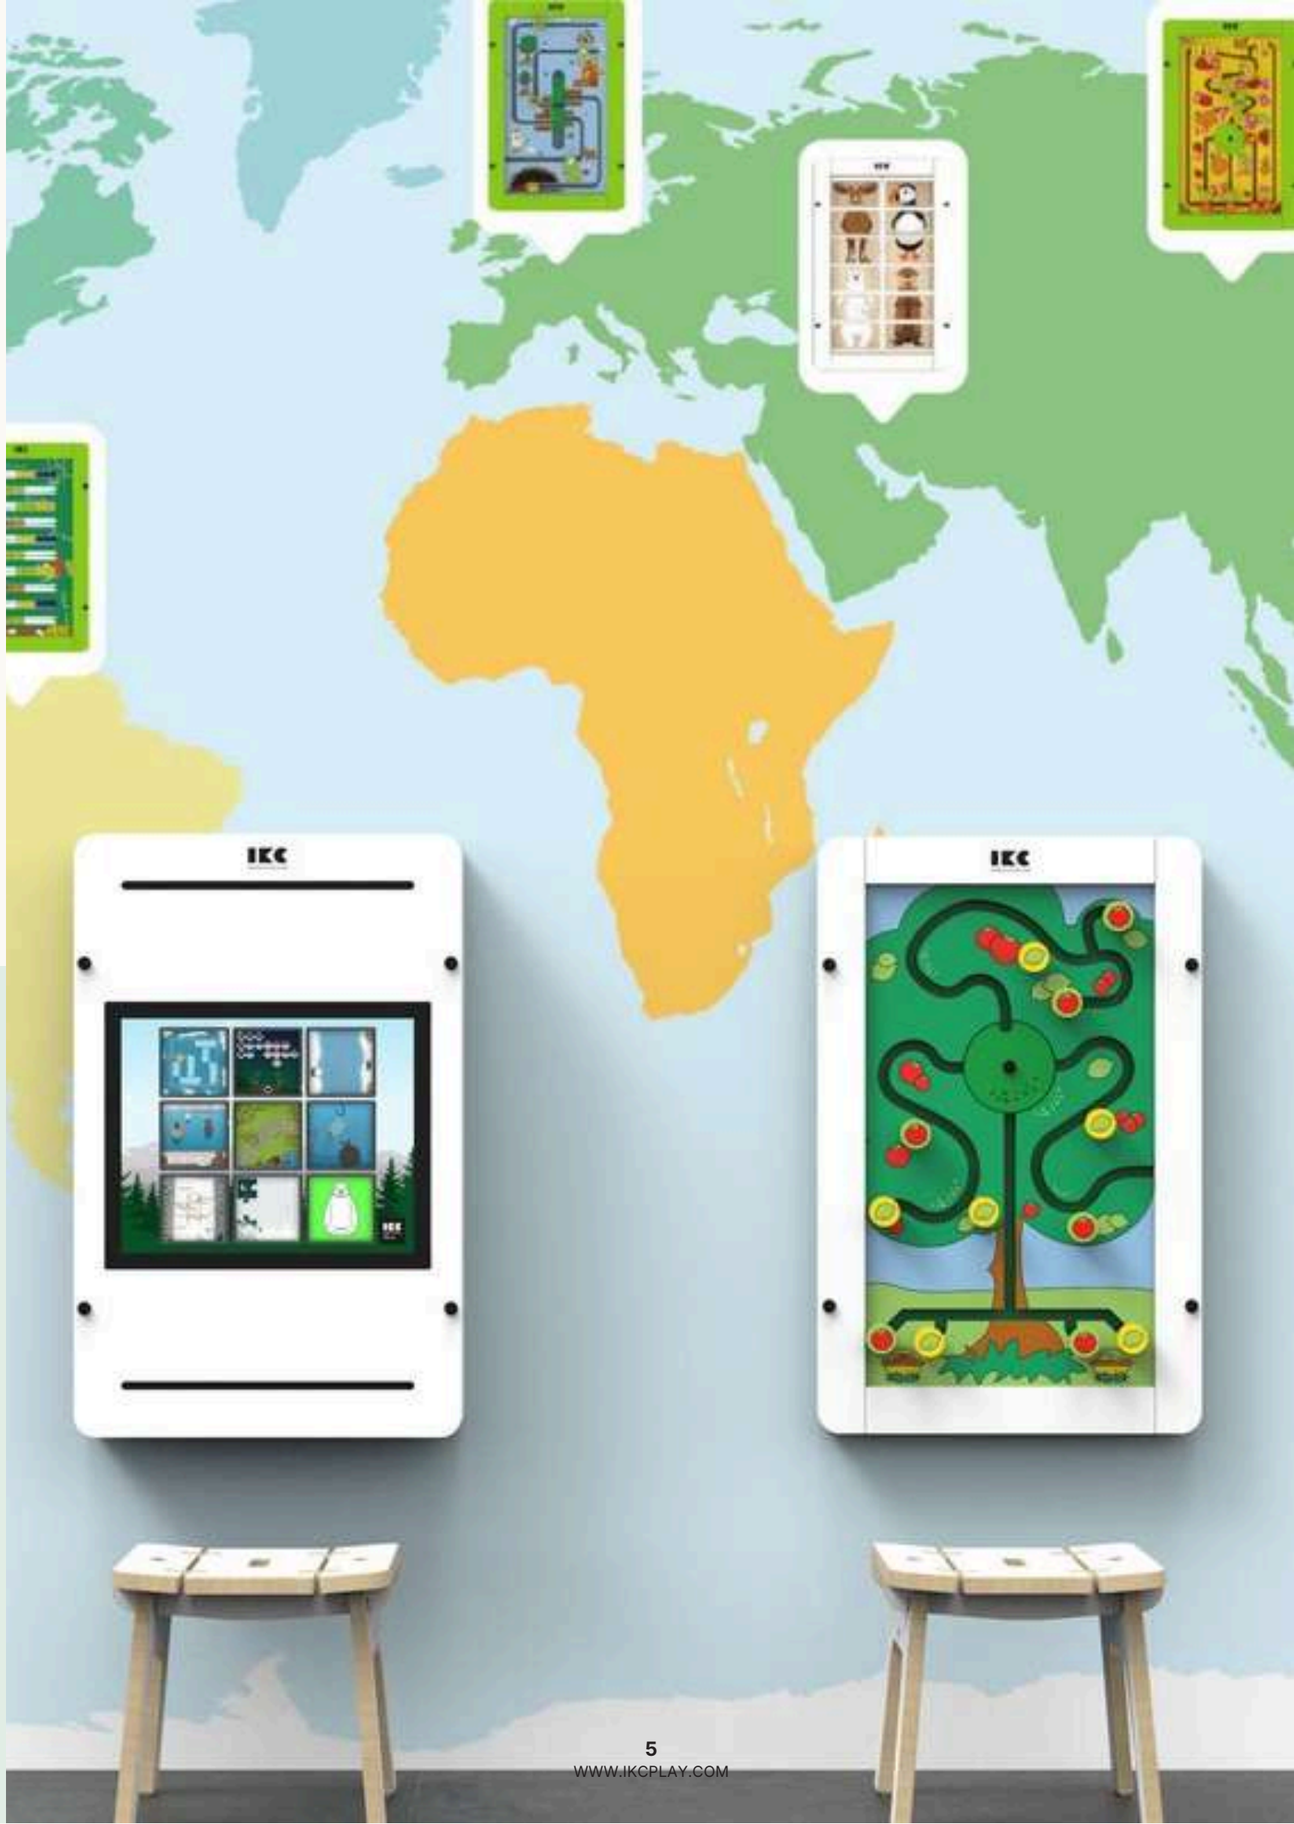
What is your fondest *childhood* memory of playing?

Perhaps a smile appears when you remember the carefree feeling of being a child: playing, laughing, creativity, self-confidence and openness.

While playing, millions of brain connections are formed that lay the foundation for the rest of life.

That is why it is our mission to work with you worldwide to create environments where children can truly be themselves.



Classic Collection

The IKC Classic Collection has been a proven success worldwide for many years. Thanks to its recognizable wooden frame, warm appearance, and cheerful colors, this collection fits effortlessly into any professional environment. From retail and hospitality to healthcare and public spaces, the Classic Collection stands for sustainable playtime fun with a timeless design.

Classic collection

Play modules

All play modules can attached to the wall or with an IKC play system.

ABACUS WHEEL

Use the spinning disc at the centre of the Abacus wheel to send the colourful numbered sliders on different paths. Then put them in numerical order from one to fifteen. Simple, but so much fun!

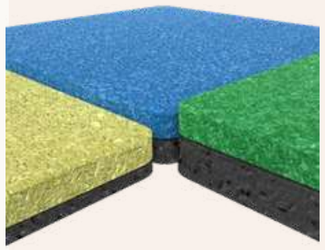
Playground design

A safe play floor is the foundation of every children’s play corner. IKC provides play floors that absorb impact, withstand intensive use and look great at the same time. From EPDM to vinyl and artificial grass: always tailored to your theme, space and corporate identity. Combine with wall games or play systems to create a complete play experience in one go.

Playground design

Various elements

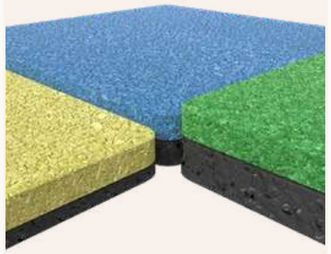


EPDM

The EPDM play floors are of high quality and offer children a safe surface to play on. The flooring is slip resistant and ensures that the impact of a fall is absorbed. According to the European safety standard, a shock-absorbent floor is mandatory if children can climb higher than 60 cm in your play corner.

EPDM is available in 16 different colours, countless colour combinations and a recently introduced glitter option.

Article no.
RB-101

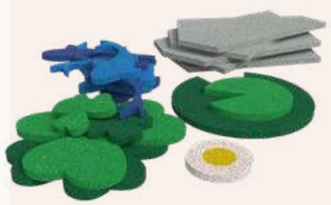


EPDM GLITTER

Glitter EPDM is available in 16 different colours and countless colour combinations. Our shock-absorbent EPDM play floors are of high quality and offer children a safe surface to play on. The flooring is slip resistant and ensures that the impact of a fall is absorbed.

According to the European safety standard, a shock-absorbent floor is mandatory if children can climb higher than 60 cm in your play corner.

Article no.
RB-105



EPDM ELEMENTS

The EPDM is constructed from small rubber granules, making it possible to incorporate figures into the floor. A few examples of the standard EPDM elements we offer are fish, flowers, water lilies and stepping stones.

To stimulate children to move more and to add extra play value to your EPDM floor, we recommend also including the Hopscotch or 3D elements like Jumping hills to the play floor.
